DUET PCS

USB DESKTOP SPEAKERPHONE

DUET OVERVIEW

THE DUET IS A HIGH-PERFORMANCE SPEAKERPHONE for desktop use that can cover small to medium room settings. It has a commanding pickup and broadcasting range and is remarkably portable.

The Duet utilizes a high-quality microphone and loudspeaker backed by a powerful DSP that runs advanced echo cancellation and noise suppression technologies.

The Duet's body is made out of aluminum and is exceptionally durable, making it great for travel. It is extremely user-friendly and its plug-and-play design eliminates the need for additional driver installations.

The Duet PCS, which is the USB only model of the Duet family, is a desktop solution specifically geared for Voice over IP (VoIP) conferencing.

This guide will help you learn how to use your speakerphone and will reveal all the features that come with it.

CONNECTING THE DUET

3.5mm External Speaker/Mic Jack

Micro USB Connector

CONNECT TO A COMPUTER

This connection is for any session using your computer, such as Voice over IP applications (Skype, Vidyo, etc.)

Using the USB cable provided plug the micro USB side of the cable into the Duet (located on the connector panel behind the unit).

Plug the USB end of the cable into any USB port on your computer.

Your Duet is ready to use. No additional drivers or steps are needed; however we do recommend downloading and using our “Phoenix Audio Setup Utility” for optimal audio controls and performance. This utility can be found on our website:

www.phnxaudio.com

For more connection options, checkout the other members of the Duet family which offer different interfacing options such as telephone, Video Codec, and Smartphones.

USING THE DUET

The Duet's control panel has three buttons:

- **Mute** (in the middle).
- **Volume Up** (to the right).
- **Volume Down** (to the left).

LIGHT INDICATIONS:

- Button panel light off - unit is off (not connected).
- Button panel light on – unit is on (connected).
- Button panel light blinking – unit is on and the microphone is muted.

BASIC UNIT OPERATIONS:

- Turn unit ON: unit is always on when connected to a power source or USB device.
- Turn unit OFF: disconnect unit from power source or USB device.
- Mute microphone: push the Mute button once. The button panel light will start blinking.
- Unmute microphone: push the Mute button once. The button panel light will stop blinking and will stay on.

NOTE: The MUTE button will mute the microphone not the speaker. To mute the speaker, just use the volume buttons to decrease the volume until no sound is audible. The volume buttons will control the level of audio heard from the speaker and not the sensitivity of the Duet's microphone. To adjust the microphone volume level, use the Phoenix Audio Setup Utility, which can be found on our website.

EXTERNAL SPEAKER

The 3.5mm “External Speaker” jack located on the Duet’s connector panel can be used to connect any type of amplified speakers. The external speakers will be used by the Duet to play sound and the Duet’s internal speaker will be muted.

2. WHAT DOES THIS LIMITED WARRANTY COVER?

This limited warranty covers mechanical, electrical, or software defects in materials and workmanship of the product purchased by you from us (the “product”) for the Warranty Period as defined below, and this limited warranty is specific to the product for which you purchased this limited warranty.

3. WHAT DOES THIS LIMITED WARRANTY NOT COVER?

This limited warranty does not cover any damage (“excluded events”) due to: (a) incidental events (e.g., coffee spills, water damage, damage resulting from dropping the product, or fire damage); (b) transportation; (c) storage; (d) improper use; (e) failure to follow the product instructions or to perform any preventive maintenance; (f) modifications; (g) unauthorized repair; (h) normal wear and tear; (i) misuse; (j) external causes such as accidents, abuse, or other actions or events beyond our reasonable control; or (k) damages or repairs that, in our opinion, result from similar events. This limited warranty does not cover incidentals, general customer dissatisfaction (such as in the case of “buyer’s remorse”), lost peripherals (e.g., misplaced cables or power supplies needed to use the product), or any damage not caused by a mechanical, electrical, or software defect.

4. WHAT WILL WE DO UNDER THIS LIMITED WARRANTY/WHAT ARE YOUR REMEDIES?

In the event of a mechanical, electrical, or software defect, malfunction, or other failure of the product not, in our opinion, the result of excluded events, we will remedy the failure or defect without charge to you. We can choose to:

- Repair the product or defective, malfunctioning, otherwise failing parts in the product within a reasonable time as solely determined by us; OR
- Replace the product or defective, malfunctioning, otherwise failing parts in the product within a reasonable time as solely determined by us.

In order to obtain warranty coverage: (1) you must have proof of your properly-obtained limited warranty pursuant to Section 1 of this limited warranty; (2) an excluded event must not have occurred with respect to the mechanical, electrical, or software defect, malfunction, or other failure in the product and/or its part(s); and (3) you must obtain a return authorization number and other return shipping information from us to allow you to ship the product and/or part of the product back to us.
