

STARTING YOUR LIVE PRESENTATION WITH CONFIDENCE? CHECK.

AS IF BY MAGIC

Multiple trigger signals from either sensor/switch, hot plug detect, IR, RS232 release multiple commands over CEC, IR or trip relays. Configure once - use over and over again.

IN-LINE 4K AV PROCESSING

The PT-C-HDCEC is built directly into the HDMI signal path. It reconditions and repeats the HDMI2.0 signal while effortlessly adding control.

A GUARANTEED PICTURE

The automatic EDID function forwards the display EDID or it can be configured manually using DIP switches. It will even down scale the image to legacy 1080p infrastructure.

„Has anyone seen the remote?“

It is Tuesday morning, shortly before 9 am. The team has gathered, the presentation is perfectly prepared, the applause is only a few slides away. „All that's left is to quickly plug in the laptop and away we go ... - Wait, why is the projector not on? Why is the projector screen not down? Where are the remote controls?!?“

Shouldn't this be easier? Maybe even automatic?

Simply plug in the HDMI cable and all devices power up, screen formats change, and motors roll into action – sound to good to be true? With the PT-C-HDCEC from PureLink, a single event, such as inserting the HDMI cable or pressing a button, initiates a cascade of commands to all system devices. This simple to use clockwork like control also includes 18Gbps video signal reconditioning and 1080p downscaling for superior reliability and compatibility.

Discover the comfort of automated control and start your next live presentation with the peace of mind that only PureLink products can provide.

The PureLink Promise

Quality standards

The experiences and expectations of ProAV customers are the focus of our product development. We listen, question needs and have the firm intention to exceed customer requirements.

Value for money

High quality must be affordable. In the ProAV sector we have distinguished ourselves precisely by this. Therefore, the following applies: Also in the future, each of our products will clearly outperform the price with its performance. Without compromise.

Reliability

The concentration on the essentials, on performance and endurance, is a guarantee for the reliability of our products. Simple, functional, durable - this is the only way to bring our claim of „Install - Connect - Perform.“ to life.
