

User Manual

8x8 HDBaseT and HDMI Matrix

Model PT-MA-HD88HDBT

Designed in Germany

Preface

Read this user manual carefully before using this product. Pictures shown in this manual are for reference only. Different model layouts and specifications are subject to the physical product.

This manual is for operation instructions only, not for any maintenance usage.

In the constant effort to improve our product, we reserve the right to make changes in functions or parameters without prior notice or obligation.

Trademarks

Product model and logo are trademarks. Any other trademarks mentioned in this manual are acknowledged as the properties of the trademark owner. No part of this publication may be copied or reproduced without the prior written consent.

FCC Statement

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. It has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a commercial installation.

Operation of this equipment in a residential area is likely to cause interference, in which case the user at their own expense will be required to take whatever measures may be necessary to correct the interference.

Any changes or modifications not expressly approved by the manufacture would void the user's authority to operate the equipment.

REACH | 1907/2006/EU

ROHS | 2011/65/EU

PureLink hereby declares that this product **PureTools PT-MA-HDBT42** complies with Directives 1907/2006/EU und 2011/65/EU.

EMC / LVD (Electro Magnetic Compatibility / Low Voltage Directive)

PureLink GmbH hereby declares that this product **PureTools PT-MA-HDBT42** complies with Directives 2014/30/EU and 2014/35/EU. The full text of the EU Declaration of Conformity is available at the following Internet address:

http://www.purelink.de/ce/4251364735015_CE.pdf

SAFETY PRECAUTIONS

To ensure the best from the product, please read all instructions carefully before using the device. Save this manual for further reference.

- Unpack the equipment carefully and save the original box and packing material for possible future shipment
- Follow basic safety precautions to reduce the risk of fire, electrical shock and injury to persons.
- Do not dismantle the housing or modify the module. It may result in electrical shock or burn.
- Using supplies or parts not meeting the products' specifications may cause damage, deterioration or malfunction.
- Refer all servicing to qualified service personnel.
- To prevent fire or shock hazard, do not expose the unit to rain, moisture or install this product near water.
- Do not put any heavy items on the extension cable in case of protrusion.
- Do not remove the housing of the device as opening or removing the housing may expose you to dangerous voltage or other hazards.
- Install the device in a place with sufficient ventilation to avoid damage caused by overheat.
- Keep the module away from liquids.
- Spillage into the housing may result in fire, electrical shock, or equipment damage.
 If an object or liquid falls or spills on to the housing, unplug the module immediately.
- Do not twist or pull by force ends of the optical cable. It can cause malfunction.
- Do not use liquid or aerosol cleaners to clean this unit. Always unplug the power to the device before cleaning.
- Unplug the power cord when left unused for a long period of time.
- Information on disposal for scrapped devices: do not burn or mix with general household waste, please treat them as normal electrical wastes.

1. Product Introduction

Thank you for choosing the PT-MA-HD88HDBT matrix. It is an 18G 8x8 HDBaseT matrix with HDMI loopout, audio matrix and ARC. It supports HDCP 2.2 and up to 4K/UHD@60Hz. It can transmit 4K video up to 70 meters and 1080p video up to 100 meters over a single CATx Ethernet cable.

The product provides performance in control and transmission, which could be used in a number of different installation scenarios, such as monitoring purposes, Home Cinema, conference systems, television education, bank security institutions, etc.

1.1 Features

- 8x8 HDBaseT matrix switcher with audio matrix.
- Fully compliant with the HDMI 2.0 and HDCP 2.2.
- Supports HDMI resolution up to 4K@60Hz 4:4:4, HDR10.
- Features four mirrored HDMI outputs for four HDBaseT outputs, and the four HDMI outputs support 4K to 1080p auto-downscaling.
- The four HDBaseT outputs support 24V PoC, allowing the receivers to draw their power from the matrix switcher over the Catx cable.
- Transmits 4K signal up to 70 meters and 1080p signal up to 100 meters over a single CATx cable.
- Supports audio matrix. Provides four digital SPDIF audio outputs and four analog L+R audio outputs for HDMI input audio de-embedding and HDBaseT output audio de-embedding. Moreover, the four digital SPDIF audio outputs supports ARC audio output from the receivers.
- Volume adjustment for analog L+R audio outputs.
- Supports comprehensive EDID management.
- Controllable via front panel buttons, RS232 local and pass-through, IR local and pass-through, CEC, and TCP/IP (built-in GUI)..

1.2 Package List

- 1x PT-MA-HD88HDBT 4x4 HDMI 2.0 HDBaseT matrix switcher
- 2x Mounting Ears with 6 Screws
- 4x Plastic Cushions with 4 Screws
- 1x IR Receiver
- 1x IR Remote
- 16x 3-pin Terminal Blocks
- 1x Power Cord
- 1x User Manual

Note: Please contact your distributor immediately if any damage or defect in the components is found.

2. Specification

2.1 Matrix Specification

Video Input		
Input	(8) HDMI	
Input Connector	(8) Type-A female HDMI	
HDMI Input Resolution	Up to 4Kx2K@60Hz 4:4:4, HDR10,1080p 3D	
Video Output		
Output	(8) HDBaseT, (8) HDMI	
Output Connector	(8) RJ45, (8) Type-A female HDMI	
HDMI Output Resolution	Up to 4Kx2K@60Hz 4:4:4, HDR10, 1080p 3D.Supports 4K to 1080p auto-downscaling.	
HDBaseT Output Resolution	Up to 4Kx2K@60Hz 4:2:0	
HDMI Audio Signal	LPCM 7.1 audio, Dolby Atmos®, Dolby® TrueHD, Dolby Digital® Plus, DTS:X™, and DTS-HD® Master Audio™ pass-through.	
Audio Output		
	(0) 6	
Output	(8) Stereo analog L+R audio, (8) Digital SPDIF audio	
Output Connector	(8) Stereo analog L+R audio, (8) Digital SPDIF audio (8) 3-pin terminal blocks, (8) Toslink connectors	
Output Connector	(8) 3-pin terminal blocks, (8) Toslink connectors	
Output Connector Analog L+R Audio Format	(8) 3-pin terminal blocks, (8) Toslink connectors Supports PCM	
Output Connector Analog L+R Audio Format Digital SPDIF Audio Format	(8) 3-pin terminal blocks, (8) Toslink connectors Supports PCM Supports PCM, Dolby Digital, DTS, DTS-HD	
Output Connector Analog L+R Audio Format Digital SPDIF Audio Format Local Audio Sampling Rate	(8) 3-pin terminal blocks, (8) Toslink connectors Supports PCM Supports PCM, Dolby Digital, DTS, DTS-HD Supports 44.1KHz, 48KHz, 96KHz	
Output Connector Analog L+R Audio Format Digital SPDIF Audio Format Local Audio Sampling Rate ARC Audio Sampling Rate	(8) 3-pin terminal blocks, (8) Toslink connectors Supports PCM Supports PCM, Dolby Digital, DTS, DTS-HD Supports 44.1KHz, 48KHz, 96KHz Supports 48KHz, 96KHz	
Output Connector Analog L+R Audio Format Digital SPDIF Audio Format Local Audio Sampling Rate ARC Audio Sampling Rate Frequency Response	(8) 3-pin terminal blocks, (8) Toslink connectors Supports PCM Supports PCM, Dolby Digital, DTS, DTS-HD Supports 44.1KHz, 48KHz, 96KHz Supports 48KHz, 96KHz 20Hz – 20KHz, ±3dB	

SNR	L+R: > 80dB, 20Hz - 20KHz bandwidth.			
SINK	SPDIF: > 90dB, 20Hz-20 kHz bandwidth.			
Crosstalk Isolation	SPDIF: < -70 dB, 10KHz sine at OdBFS level (or max level before clipping). L+R: < -80 dB, 10KHz sine at OdBFS level (or max level before clipping).			
L-R Level Deviation	L+R: < 0.3dB, 1KHz sine at OdBFS level (or max level before clipping).			
Frequency Response Deviation	< ± 0.5dB 20Hz - 20KHz.			
Output Load Capability	L+R: 1K Ω and higher (Supports 10x paralleled 10K Ω loads).			
Stereo Channel Separation	>70dB@1KHz.			
Noise Level	L+R: -80dB; SPDIF: -90dB			
Control Part				
Control port	(8) IR IN, (1) IR ALL IN, (8) IR OUT, (1) IR ALL OUT, (1) IR EYE, (9) RS232, (1) FIRWARE, (1) TCP/IP			
Control Connector	(19) 3.5mm jacks, (9) 3-pin terminal blocks, (1) Type-A USB, (1) RJ45			
General				
Transmission Mode	HDBaseT			
Transmission Distance	1080p ≤100 meter, 4K@60Hz ≤ 70 meter			
Bandwidth	18Gbps			
Operation Temperature	-5℃ ~+55℃			
Storage Temperature	-25℃ ~+70℃			
Relative Humidity	10%~90%			
External Power Supply	100V~240V AC, 50/60Hz			
Power Consumption	125W (Max)			
Dimension (W*H*D)	436.6mm x 88mm x 440mm			
Net Weight	5.8kg			

2.2 2.2 Receivers compatibility chart

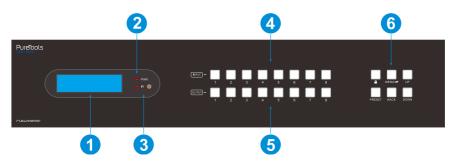

The recommended matchable receiver for this matrix is PT-HDBT-230-RX, and here below is the compatibility chart of the other HDBaseT receivers from our product line.

Receiver Compatibility Chart					
NO.	Part#	Signal(video, audio, control)	Power	Distance	Maximum Resolution
1	PT-HDBT-230-RX	Yes	Yes	4K at 70m, 1080p at 100m	4K60Hz 4:4:4
2	PT-HDBT-210-RX	Yes	Yes	4K at 40m, 1080p at 70m	4K60Hz 4:2:0
3	PT-HDBT-702-RX	Yes	Yes	4K at 40m, 1080p at 70m	4K60Hz 4:2:0
4	PT-HDBT-100-RX	Yes	Yes	4K at 40m, 1080p at 70m	4K60Hz 4:2:0
5	PT-HDBT-200-RX	No	No	N/A	N/A

3. Panel Description

3.1 Front Panel

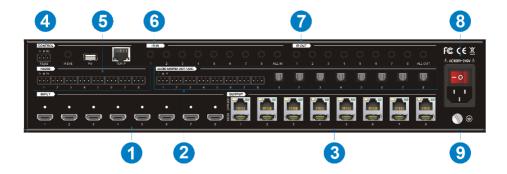

No.	Name	Description		
1	LCD Screen:	Presents real-time operation status.		
2	Power LED:	Illuminates RED when the device is in standby mode, illuminates GREEN when device is powered on.		
3	IR Sensor and its LED	Illuminates RED when the IR sensor receives an IR signal from the IR remote to control the matrix switcher. The IR sensor is on the right side of the LED.		
4	INPUT:	Eight buttons for input source selection.		
(5)	OUTPUT:	Eight buttons for output channel selection.		
6	Menu Buttons:	 LOCK: Lock or unlock the front panel buttons. PRESET: Preset setting. MENU/√: Menu or confirm button. BACK: Go back to the previous operation. UP: Page up. DOWN: Page down. 		

3.2 Rear Panel

No. Name

Description

	Hallic	Description		
1	INPUT:	Eight type-A female HDMI input ports to connect HDMI sources.		
2	AUDIO MATRIX OUT/ARC	Eight 3-pin terminal blocks and eight Toslink connectors to connect speakers or amplifiers for HDMI input audio de-embedding or HDBaseT output audio de-embedding, and the eight Toslink connectors can also be used for ARC audio output from HDBaseT receivers. They can make up an audio matrix to be set by front panel buttons, GUI or RS232 commands.		
3	ОИТРИТ	Eight HDBaseT RJ45 outputs to connect the eight HDBaseT receivers, and eight local HDMI ports to connect local displays.		
4	CONTROL	 RS232: 3-pin terminal block to connect the control device (e.g. PC) to control the matrix switcher by RS232 commands. IR EYE: 3.5mm jack to connect IR receiver to control the matrix switcher by the IR remote. FW: Type-A USB port for firmware upgrade. TCP/IP: RJ45 port to connect the control device (e.g. PC) to control the matrix switcher by GUI. 		

5	RS232	Eight 3-pin terminal blocks to control the third-party devices base on RS232 pass-through feature. There is a one-to-one correspondence between the eight RS232 ports and the eight RS232 ports of eight HDBaseT receivers.
6	IR IN	 1-8: Eight 3.5mm jacks to connect eight IR receivers. Each IR input is associated with the respective HDBaseT output and cannot be switched separately. It makes up a bi-directional IR transmission with the IR OUT on the corresponding HDBaseT receiver. ALL IN: 3.5mm jack to connect the IR receiver to transmit the IR signal from the ALL IN port to all HDBaseT receivers.
7	IR OUT	 1~8: Eight 3.5mm jacks to connect eight IR emitters to send the IR signal received from the corresponding HDBaseT receivers. ALL OUT: 3.5mm jack to connect the IR emitter to send the IR signal received from all HDBaseT receivers.
8	AC100V-240V	Power port to connect an AC 100V~240V power by the power cord.
9	GROUND	Connect to earth to ensure the unit is well grounded.

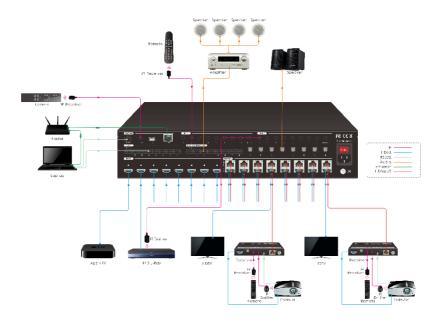

4. System Connection

4.1 Usage Precaution

- Make sure all components and accessories are included before installation.
- The System should be installed in a clean environment with appropriate temperature and humidity.
- All of the power switches, plugs, sockets, and power cords should be insulated and safe.
- All devices should be connected before power on.

4.2 System Diagram

The following diagram illustrates typical input and output connections that can be utilized with this matrix switcher:

5. Button Control

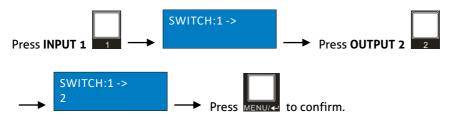

The matrix switcher can be controlled by using the buttons on the front panel. Whenever a command is accepted, the indicators of all the buttons pressed will blink three times then they will go off. If the command fails, the indicators will go off immediately without blinking.

5.1 Signal Switching

· Switch an input to an output

Operation: INPUT# + OUTPUT# + MENU/4

Example: Switch Input 1 to Output 2:

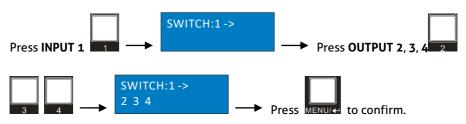

Note: In default status, 4 IR OUT ports correspond with 4 HDMI INPUTS. When you switch an HDMI input, the corresponding IR OUT will be switched synchronously.

• Switch an input to several outputs

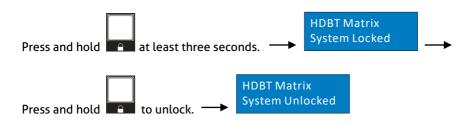

Operation: INPUT# + OUTPUT# + OUTPUT# +... + MENU/4

Example: Switch Input 1 to Output 2, 3, and 4.

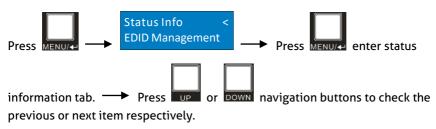

5.2 Panel Button Locking/Unlocking

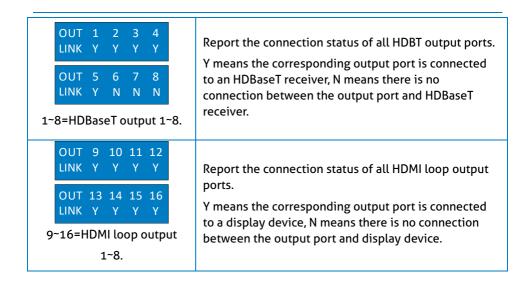

5.3 Status Information Inquiry

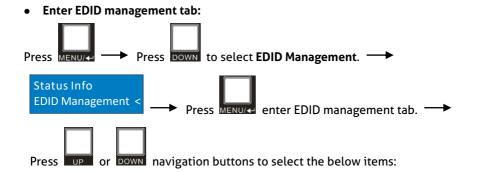

LCD Screen			en		Description	
IN OUT	_		1 3			
	1 5	1 6	1 7	1 8	Report the signal switching status.	
IN LINK	1 Y	2 Y	3 Y	4 Y	Report the connection status of all HDMI input ports. Y means the corresponding input port is connected t	
IN LINK	5 Y	6 N	7 N	8 N	a source device, N means there is no connection between the input port and source device.	

5.4 EDID Management

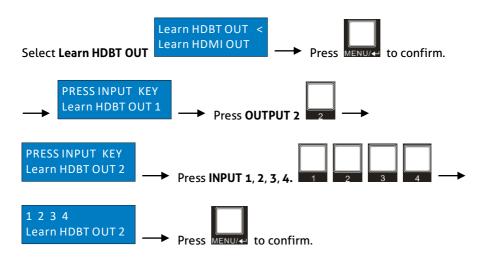

The Extended Display Identification Data (EDID) is used by the source device to match its video resolution with the connected display. By default, the four source devices use the fifth built-in EDID: 4K@60Hz HDR 2CH.

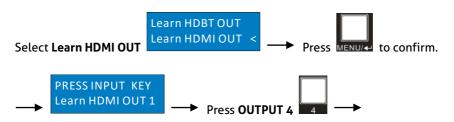

- ✓ Learn HDBT OUT
- ✓ Learn HDMI OUT
- ✓ Built-in EDID
- To copy the EDID data from one HDBT output to one or several inputs:

Example: Input 1, 2, 3 and 4 learn the EDID data of HDBT output 2.

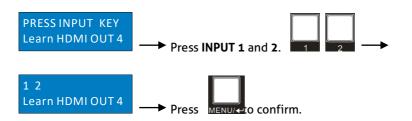

• To copy the EDID data from one HDMI output to one or several inputs:

Example: Input 1 and 2 learn the EDID data of HDMI output 4.

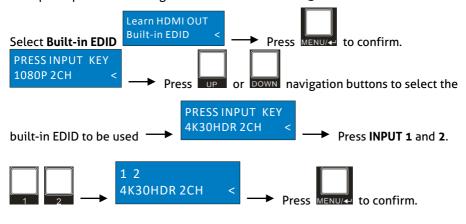

• Using the built-in EDID setting:

There are six types of built-in EDID data which can be utilized, as shown as below:

No.	EDID			
NO.	Video	Audio		
1	1080p	2CH		
2	1080p HDR	MultiCH		
3	4K@30Hz HDR	2CH		
4	4K@30Hz HDR	MultiCH		
5 (Default)	4K@60Hz HDR	2CH		
6	4K@60Hz HDR	MultiCH		
	User Custom			

Example: Input 1 and 2 using the built-in EDID data: 4K@30Hz HDR 2CH.

5.5 Audio Setting

The matrix switcher provides four analog L+R audio output ports and four digital SPDIF output ports for audio de-embedding. The audio source selection of these eight audio output ports, and the L+R audio volume can be controlled by the front panel buttons.

Audio Source Selection

There are eight audio sources which can be selected for any analog L+R audio output port, and twelve audio sources with can be selected for any SPDIF audio output port.

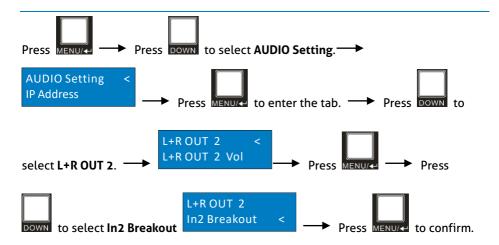

Audio Output Borts	Audio Sources			
Audio Output Ports	Input Breakout	Output Breakout	ARC	
L+R OUT 1	In1 Breakout	Out1 Breakout		
L+R OUT 2	In2 Breakout	Out2 Breakout		
L+R OUT 3	In3 Breakout	Out3 Breakout		
L+R OUT 4	In4 Breakout	Out4 Breakout	,	
L+R OUT 5	In5 Breakout	Out5 Breakout	,	
L+R OUT 6	In6 Breakout	Out6 Breakout		
L+R OUT 7	In7 Breakout	Out7 Breakout		
L+R OUT 8	In8 Breakout	Out8 Breakout		
SPDIF OUT 1	In1 Breakout	Out1 Breakout	Out1 ARC	
SPDIF OUT 2	In2 Breakout	Out2 Breakout	Out2 ARC	
SPDIF OUT 3	In3 Breakout	Out3 Breakout	Out3 ARC	
SPDIF OUT 4	In4 Breakout	Out4 Breakout	Out4 ARC	
SPDIF OUT 5	In5 Breakout	Out5 Breakout	Out5 ARC	
SPDIF OUT 6	In6 Breakout	Out6 Breakout	Out6 ARC	
SPDIF OUT 7	In7 Breakout	Out7 Breakout	Out7 ARC	
SPDIF OUT 8	In8 Breakout	Out8 Breakout	Out8 ARC	

Example: Select the HDMI input 2 audio source for the analog L+R output 2.

User Manual

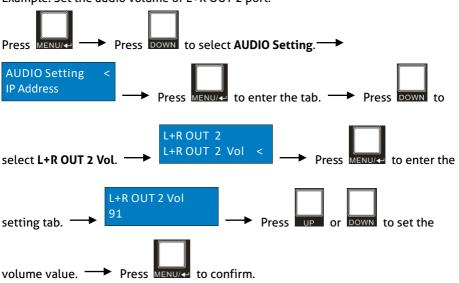

PT-MA-HD88HDBT

• L+R Output Audio Volume Control

Example: Set the audio volume of L+R OUT 2 port.

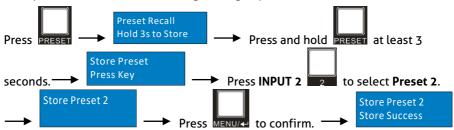

5.6 Preset Setting

Pressing the PRESET button saves the current switch routing or loads the saved preset layout.

Note: The matrix switcher supports nine presets, but only preset 1~4 can be saved and recalled by button control. Please manage other preset by GUI control or RS232 control.

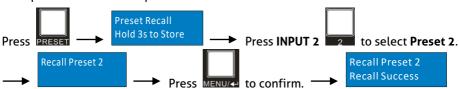

Save the current switching routing to a preset

Example: Save the current switching routing to preset 2.

• Recall a saved preset

Example: Recall the saved preset 2.

5.7 IP Address Inquiry

6. GUI Control

The matrix can be controlled via TCP/IP. The default IP settings are:

IP Address: 192.168.0.178 Subnet Mask: 255.255.255.0

TCP/IP Port: 4001

TCP/IP Commands are same as RS232

Type <u>192.168.0.178</u> in the internet browser, it will enter the below log-in webpage:

There are three selectable usernames:

Username	Password	Access Tab
admin	admin	All tabs
User2	User2	configurable
User3	User3	configurable

The username and password can be changed via Access tab.

Here we login as "admin" as an example to introduce each GUI tab.

6.1 Signal Switching

Use the 8x8 button grid on the page to set which inputs are directed to which outputs. For example, clicking the button on the Input 1 row and Output 2 column, directs input 1 to output 2.

Use the 9 numbered buttons under scene area to save and load layout presets.

- To save a given layout, first click one of the numbered buttons, then click the Save button.
- To load a previously saved layout, first click one of the numbered buttons, then click the Recall button.

6.2 Audio Setting

Audio Source Selection

 There are sixteen audio sources can be selected for eight analog L+R audio output ports, and twenty-four audio sources can be selected for four digital SPDIF output ports.

• L+R Output Audio Volume Control

 Adjust L+R output audio volume by the volume bar and the three buttons on the right side.

6.3 Configuration Tab

6.3.1 Auto-downscaling

Enable/disable video resolution auto-downscaling function of HDMI output 1~8 ports.

When enable auto-downscaling, the 4K input can be automatically degraded to 1080p output for compatibility with 1080p display which is connected to the HDMI output port.

6.3.2 EDID Copy

• Copy the EDID data from a single output port to one or several input ports.

Operation:

- 1) Select one output port.
- 2) Select one or several input ports. Press ALL to select all input ports.
- 3) Click **Confirm** to save any changes or click **Cancel** to cancel any changes that have been made.

6.3.3 EDID Setting

Click **EDID Setting** to enter the below section to set a predefined EDID for input ports.

Select a built-in EDID for one or several input ports.

Operation:

- 1) Select a built-in EDID.
- 2) Select one or several input ports. Press **ALL** to select all input ports.
- 3) Click Confirm to save setting.
- Upload user-defined EDID by the below steps:
- 1) Prepare the EDID file (.bin) on the control PC.
- 2) Select the User-defined.
- 3) Click the box and then select the EDID file (.bin) according the tooltip.
- 4) Click **Apply** to upload the user-defined EDID, and then click **Confirm** to save setting.

6.4 CEC Tab

If the input source devices, HDBaseT output devices and local HDMI output devices support CEC, they can be controlled via the following CEC interface.

6.4.1 Input Source Device Control

 Select one or several HDMI input source devices to be controlled, and then press function buttons.

6.4.2 HDBT Output Device Control

 Select one or several HDBaseT output devices to be controlled, and then press function buttons.

6.4.3 HDMI Output Device Control

Select one or several HDMI output devices to be controlled, and then press function buttons.

.

6.5 RS232 Tab

 Send RS232 commands to control third-party devices which are connected to the far-end HDBaseT receivers.

Operation:

- Select the HDBaseT port which is connected to HDBaseT receiver which must have third-party device attached.
- 2) Set the baud rate.
- 3) Typing the commands in the box to control the selected remote third-party device which is connected to HDBaseT receiver. If click the Hex, the RS232 commands can be typed with hexadecimal value.
- 4) Click **Send** to transmit RS232 command to the selected HDBaseT port.

6.6 Access Tab

- Modify username and password.
- Lock or unlock the front panel buttons.
- Enable or disable automatic log-off mode.
- Configure accounts user2 and user3

6.7 Interface Setting

Modify title bar label, LCD readout and button labels.

Click **Confirm** to save any changes or click **Cancel** to cancel any changes that have been made.

6.8 Network Setting

- Static IP or Dynamic Host Configuration Protocol (DHCP).
- Modify the static IP Address, Subnet Mask, and Gateway.

6.9 GUI Upgrade

Please visit at http://192.168.0.178:100 for GUI online upgrade.

Type the username and password (the same as the GUI log-in setting, modified password will be available only after rebooting) to login the configuration interface. After that, click **Administration** in the source menu to get to **Upload Firmware** as shown below:

Select the update file and click Apply button, and then it will start upgrade process.

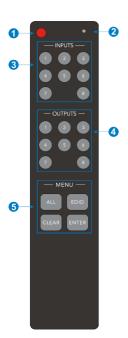

7. IR Control

7.1 IR Remote Control

The matrix switcher has a built-in IR sensor on the front panel for receiving IR control signal from IR remote. In addition, it also provides IR EYE port on the rear panel to connect an external IR receiver for IR local control.

The matrix switcher can be controlled by the below IR Remote:

- ① Enter/exit standby mode.
- ② Blinking red when a button is pressed.
- 3 Video source selection buttons.
- ① Output channel selection buttons.
- ⑤ Menu buttons:
 - ALL: Select all inputs or all outputs.
 - EDID: Enable one or several input sources to manually capture and learn the EDID data of output device.
 - CLEAR: Cancel the current operation, if ENTER has not been pressed.
 - ENTER: Confirm the desired operation.

Note: The IR receivers which are connected to HDBaseT receivers also can receive the IR signal of the IR remote, so the matrix switcher also can be controlled by the IR remote at the far-end HDBaseT receivers' position. The IR remote-control mode can be enabled or disabled by sending RS232 command "IRRCM[XX]ON."/
"IRRCM[xx]OFF." ([XX]=00~04). Please refer to the <u>8.3.1 System Control</u> for more details.

7.2 IR Pass-through Control

The matrix switcher supports bi-directional IR pass-through, allowing the devices to be controlled by both source and destination ends. This section provides connection and switching examples to illustrate possible configurations.

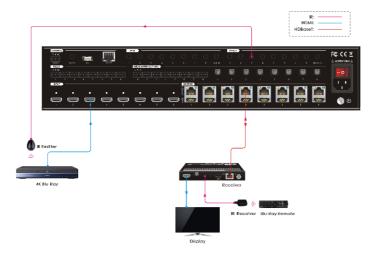

7.2.1 Control Local Input Device from Remote

The same basic principle applies when controlling the local input device from the remote location.

Control local input device through IR OUT port

Example: Switch HDMI input 3 to HDBaseT output 4.

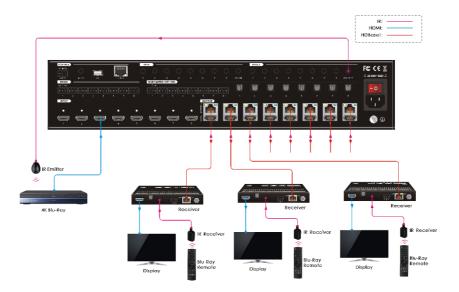

Connect an IR receiver to **IR IN** port on the receiver, then connect an IR emitter to the **IR OUT 3** on the matrix switcher. The third input source can be controlled through its corresponding IR output port. The connection diagram shown as below:

• Control local input device through IR ALL OUT port

The emitter can be connected to the **IR ALL OUT** port on matrix switcher to control all local input devices. In this case, the IR receiver must be connected to the **IR IN** port on each connected HDBaseT receiver, as shown in the diagram below:

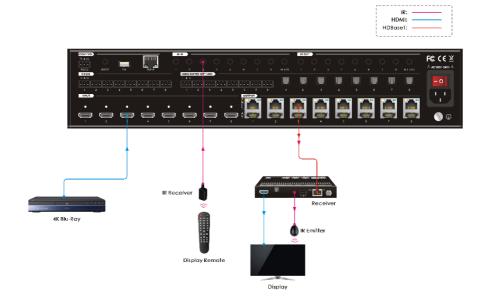

7.2.2 Control Remote Output Device from Local

The remote displays can be controlled from the local matrix switcher location.

• Control remote device through IR IN port

Example: Switch HDMI input 3 to HDBaseT output 3.

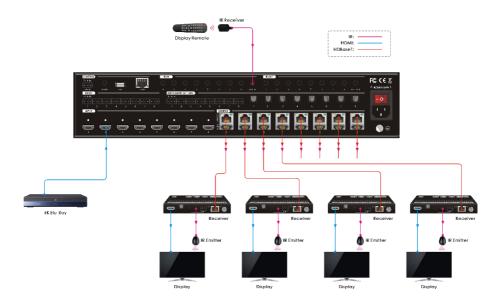

Connect an IR receiver to IR IN 3 port on the matrix switcher, then connect an IR emitter to the IR OUT on the receiver, as shown in the diagram below:

• Control remote device through IR ALL IN port

The receiver can be connected to the **IR ALL IN** port on matrix switcher to control all remote output devices. In this case, the IR emitter must be connected to the **IR OUT** port on each connected HDBaseT receiver, as shown in the diagram below:

8. RS232 Control

8.1 RS232 Control Connection

8.1.1 Control the Matrix Switcher from Local

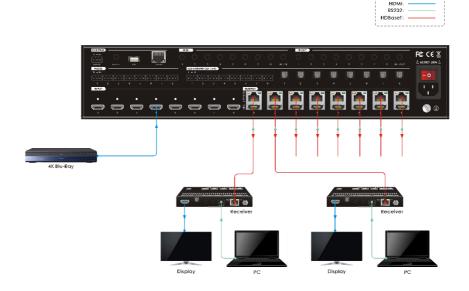

To control the matrix switcher from a local PC, the **3-pin to DB9 RS232 Cable** is used to connect between the matrix and PC. The connection diagram is shown as below:

8.1.2 Control the Matrix Switcher from Remote

To control the matrix switcher from remote location, please connect one or more PCs to the RS232 ports of HDBaseT receivers with the 3-pin to DB9 RS232 Cables. The matrix switcher can be controlled by any one of PCs, the connection diagram is shown as below:

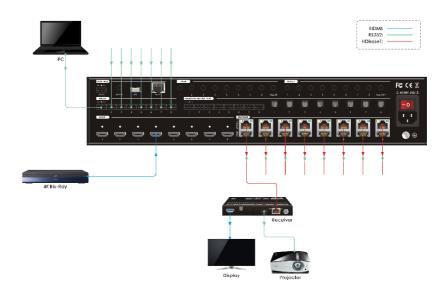

Note: The command "**RS232RCM**[XX]**ON.**" ([XX]=00~04) needs to be sent to enable or disable this control mode. For example, send the command "**RS232RCM00ON.**" to enable the remote-control mode for all HDBaseT outputs, and send the command "**RS232RCM00OFF.**" to disable the remote-control mode for all HDBaseT outputs. Please refer to the 8.3.1 System Control for more details.

8.1.3 Control the Remote Third-party Device from Local

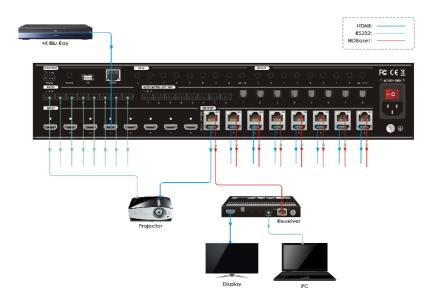

To control a third-party device from local, first determine which HDBaseT receiver is connected to (1 in the diagram below). Next, connect a PC to the corresponding RS232 port of matrix switcher with 3-pin to DB9 RS232 Cable, then connect a third-party device (e.g. projector) to the RS232 port of the determined HDBaseT receiver. The remote third-party device can be controlled by the local PC, the connection diagram is shown as below:

8.1.4 Control the Local Third-party Device from Remote

To control a third-party device from remote, first determine which HDBaseT receiver is connected to (1 in the diagram below). Next, connect a PC to the RS232 port of HDBaseT receiver with 3-pin to DB9 RS232 Cable, then connect a third-party device (e.g. projector) to the RS232 port of matrix switcher. The local third-party device can be controlled by the remote PC, the connection diagram is shown as below:

8.2 RS232 Control Software

Connect the RS232 port to control device (e.g. PC) with RS232 cable. The switcher can be controlled by sending RS232 commands.

Here take the software docklight as an example.

Installation

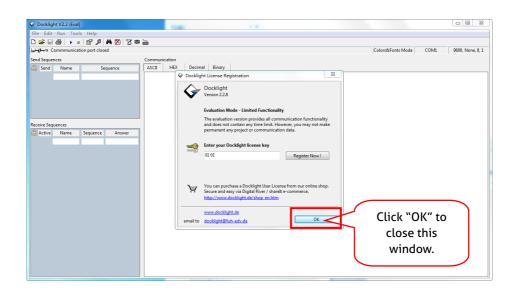

Please download the latest Software Version from the link below:

https://docklight.de/download/Docklight.zip

Then follow the installation wizard for installation on Windows 7 and 10.

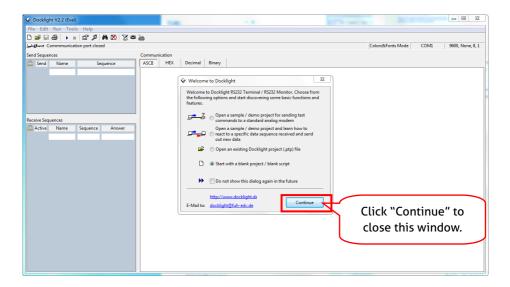

After the installation, Docklight can be run for the first time and should look like the below screen shot:

Registration is not necessary unless you wish to save settings on exit, so unless you wish to register click on "OK" to close the window.

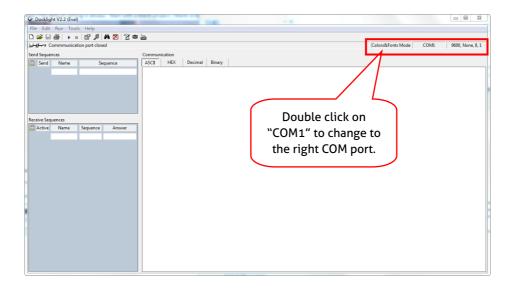

The next pop-up window can also be closed with "Continue". An empty project is enough to send and receive commands easily (The default setting is always "Start with a blank project / blank script ")

Now you are in the main view, where commands are sent and feedback is received.

The next step is to select the correct COM port of the PC. To do this, double-click on "COM1" in the corresponding setup window.

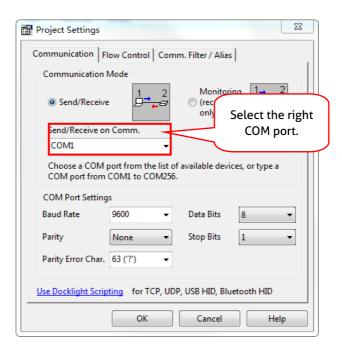

In the following window, select the drop-down menu labeled "Send / Receive on Comm Channel", select the appropriate COM port and then click on "OK" at the bottom right corner.

All other settings can be left at default for most applications, but refer to device RS232 settings to be sure.

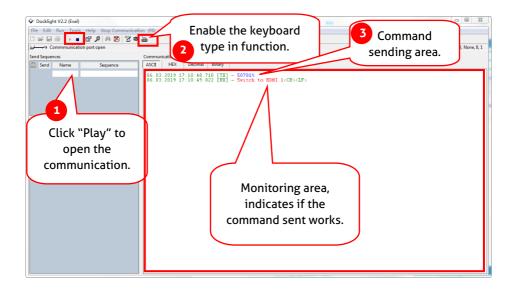

In order to be able to send commands, open communication with the device by clicking on "Play". (1)

Then the keyboard function must be activated, so that commands can be written in the "communication window". (2)

Finally enter the command, for example "50701%". This is then confirmed by pressing "Enter" to send. Any response from the connected device will appear in red. (3)

PureTools

8.3 RS232 Communication Commands

When controlling the matrix, the serial port settings for all RS232 commands is:

Baud rate: 9600 Data bit: 8 Stop bit: 1 Parity bit: none

The matrix switcher can be controlled by sending the following RS232 commands:

Note:

- Please remember to end the commands with the ending symbols "." or ";".
- Type the command carefully, it is case-sensitive.
- All commands ended without "<CR><LF>".

The third-party device is connected to the far-end HDBaseT receiver of connecting the HDBT output 1 port.

8.3.6 CEC Control

If the input sources, HDBaseT output devices and local HDMI output devices are supports CEC, they can be controlled by sending the following command instead of IR remote.

CEC[I/O][AA][BB][CC][DD].

- The "[I]" represents the input port. The "[O]" represents the output port.
- The "[AA]" represents the port number. The HDMI input ports are 01~04. The HDBaseT output ports are 01~04 and the local HDMI output ports are 05~08.
- The "[AA]" is "FF" for sending command to all input or output ports.
- The "[BB]" represents the device type (e.g. TV: 40/20/80; Blu-ray DVD: 04/08).
- The "[CC]" represents the function type (e.g. "44": Remote control).
- The "[DD]" represents the specific command from the table below.

✓ Control the input source:

Command	Description	Command Example and Response
CECI[AA][BB][CC]00.	Confirm operation (Enter).	CECI02044400
CECI[AA][BB][CC]00.	Commin operation (Linter).	CEC Input 02 Send Success!
CECI[AA][BB][CC]01.	UP direction.	CECI01044401.
CECI[AA][BB][CC]01.	or direction.	CEC Input 01 Send Success!

	Mute	CEC Output 05 Send
		Success!
		CECO038004.
CECO[AA][BB]04.	Power on.	CEC Output 03 Send
		Success!
		CECO038036.
CECO[AA][BB]36.	Power off.	CEC Output 03 Send
		Success!

9. Firmware Upgrade

Please follow the steps as below to upgrade firmware by the **FW** port on the rear panel:

- 1) Prepare the latest two upgrade files and rename them as "08010000.APP" and "08010000.APS" on PC.
- 2) Power off the switcher, and connect the **FW** port of switcher to the PC with USB cable.
- **3)** Power on the switcher, and then the PC will automatically detect a U-disk named of "BOOTDISK".
- 4) Double-click the U-disk, a file named of "READY.TXT" would be showed.
- Directly copy one of two upgrade files (e.g. "08010000.APP") to the "BOOTDISK" U-disk.
- 6) Reopen the U-disk to check the filename "READY.TXT" whether automatically becomes "SUCCESS.TXT", if yes, the firmware was updated successfully, otherwise, the firmware updating is fail, the name of upgrade file should be confirm again, and then follow the above steps to update again.
- 7) Repeat step 5~6 to copy the other upgrade file ("08010000.APS") to the "BOOTDISK" U-disk.
- 8) Remove the USB cable after firmware upgrade.
- **9)** After firmware upgrade, the switcher should be restored to factory default by sending command.

Static becomes stronger when connecting the video connectors.	Bad grounding.	Check the grounding and make sure it is connected well.

Cannot control the device by control device (e.g. a PC) through RS232 port.	Wrong RS232 communication parameters.	Type in correct RS232 communication parameters.
	Broken RS232 port.	Send it to authorized dealer for checking.
Cannot control the device by front panel buttons while can control it through RS232 port	The front panel buttons are locked.	Send command /%Unlock; to unlock the front panel buttons.

Note: If your problem persists after following the above troubleshooting steps, seek further help from authorized dealer or our technical support.

11. After-Sales Service

If problems occur while operating the product, please use the troubleshooting and maintenance information in this manual to deal with these problems. Any transport costs are borne by the user during the warranty period.

- Product Limited Warranty: The product will be free from defects in materials and workmanship for three years (purchase invoice date shall prevail).
 A proof of purchase is the evidence that the unit is within the warranty period. A bill of sale or receipted invoice must be presented to obtain warranty service.
- 2) What the warranty does not cover (servicing available for a fee):
 - Warranty has expired
 - The factory applied serial number has been altered or removed from the product.
 - Damage, deterioration or malfunction caused by:
 - Normal wear and tear.
 - Use of accessories, supplies or parts, not meeting our specifications.
 - No bill of delivery or invoice as proof of warranty.
 - The product model displayed on the warranty card does not match the product model for repairing or it has been altered.
 - Damage caused by force majeure.
 - Servicing, not authorized by distributor.
 - Any other cause not related to a product defect.
 - Delivery, installation or labor charges for product installation and/or product setup.
- 3) Technical Support: For any questions or problem troubleshooting inquiries, contact your distributor or reseller. Please provide the respective product name and version, a detailed description of the failure situation as well as how the failure occurred.
